Introduction

Too many Americans have an unhealthy relationship with money and debt.

- **65% of Americans** are living paycheck to paycheck.¹
- **Only 44% of Americans** would be able to afford a \$1,000 emergency from savings.²
- **28% of Americans** have nothing saved for the future and 39% aren't contributing to a retirement fund.³
- **84% of Americans** who have a monthly budget report exceeding their budget.⁴
- **Only 45% of millennials** could correctly answer personal finance questions in a recent study.⁵

These staggering numbers highlight the critical need to provide children, especially young adults, with a better grasp on financial basics, such as budgeting, saving, credit and debt, financial planning and money management, investing, risk and risk management. States are beginning to recognize the need for providing instruction in financial basics. In the past five years, 27 states have made financial literacy a high school graduation requirement. Fourteen of these states required a stand-alone personal finance course.

This report provides an overview of state actions to help make students more financially literate. The report looks at the three major categories of support states offer to students.

- 1) First, the report documents which states require financial literacy for high school graduation and how students access financial literacy instruction. In a 2022 survey, 88% of adults said their state should require a semester- or year-long personal finance course for high school graduation.⁶ Should personal finance instruction be provided through a stand-alone course, integrated with Economics or another specified course, left to school district discretion on when and where to embed personal finance concepts, or not required at all? Some research indicates that when financial literacy instruction is authorized to be embedded, not all students receive that instruction.⁷
- 2) The report also describes state actions in addressing financial literacy in grades K-8 to help students build personal finance skills early in life. Research shows that children form money habits as early as five years old.⁸
- 3) Finally, the report reviews state decisions on teacher staffing for financial literacy instruction, including training and credentials. One of the challenges states face in providing financial literacy instruction is the lack of a trained workforce.⁹

While examining these three components—access and high school graduation requirements, K-8 instruction, and teaching workforce—we uncovered emerging trends, challenges and opportunities as states attempt to develop more financially literate students. Finally, we make recommendations to improve current approaches to helping students become financially literate.

Methodology

For the report, we reviewed legislative, state board of education and department of education websites. We began by reviewing legislative action within the past five years and followed the legislation through administrative rulemaking or agency guidance, looking for several components:

- Student access to personal finance instruction;
- State high school graduation requirements, including the allowance of personal finance as a substitution for core graduation requirements and whether the flagship institution in the state recognizes the substitution for university admission requirements;
- State academic standards for K-8 that include financial literacy concepts;
- Teacher credentialing requirements for teaching financial literacy; and
- Additional noteworthy actions by the state to ensure students become more financially literate (e.g., assessment).

Findings

FINDING #1 — States have taken significant action to require financial literacy for students in the past five years.

In the past five years, there has been an explosion in financial literacy legislation. More than half of states (27) have passed laws or adopted rules to require financial literacy instruction in high school. The three main ways that states require financial literacy instruction are (1) as a stand-alone course, (2) to integrate it into another course, or (3) to embed personal finance concepts into one or more courses. The predominant trend has been to require a stand-alone course for high school graduation. These efforts have enjoyed bipartisan support.

Student Access to Personal Finance Instruction and High School Graduation Requirements

In the past five years, 14 of the 27 states that have adopted financial literacy instruction requirements in high school have made the requirement a stand-alone personal finance course. These states are Alabama, California, Connecticut, Florida, Indiana, Kansas, Louisiana, Minnesota, Nebraska, Oregon, Pennsylvania, South Carolina, West Virginia and Wisconsin. Tennessee and Utah also require a stand-alone personal finance course for students, but both these states adopted the requirement more than five years ago. In all, 16 states require students to take a stand-alone personal finance course in high school.

The remaining 13 states allow instruction through integrated courses (most often with a course in Economics) or by embedding it in other courses. These states are Arizona, Georgia, Idaho, Iowa, Michigan, Mississippi, Nevada, New Hampshire, New Mexico, North Carolina, Ohio, Rhode Island and Texas.

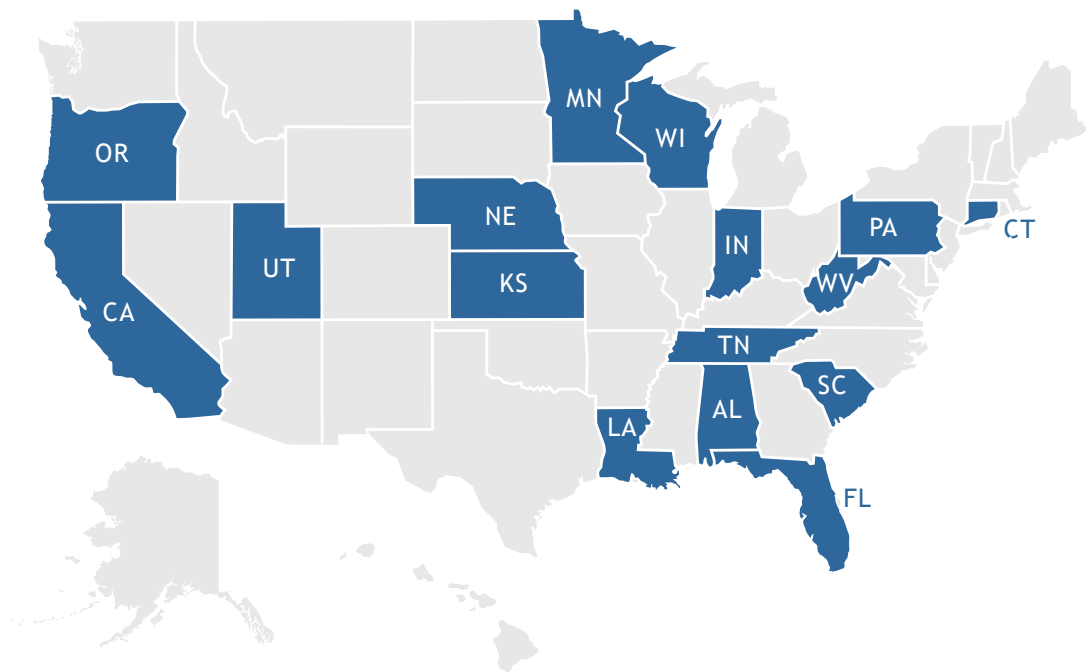

In addition to the 27 states taking action on financial literacy in the past five years, Montana has allowed students to choose between a stand-alone personal finance course or Economics to meet high school graduation requirements. Maine and Oklahoma also took legislative action on financial literacy in the past five years; however, both states previously required financial literacy instruction for high school graduation purposes.

Support for Financial Literacy Requirements Is Bipartisan

While there has been significantly more action occurring in states with Republican-majority legislative leadership, financial literacy appears to have significant bipartisan support within each of the states mentioned above. Seven of the states that have passed legislation in the past five years requiring financial literacy instruction had final, unanimous votes: Alabama, California, Florida, Idaho, Indiana, Nebraska and Nevada. The remaining states had overwhelming bipartisan support when the financial literacy bill was not part of a larger omnibus or budget bill. Political support matches with public polling support for financial literacy instruction as a requirement for high school students.¹⁰

¹⁰ - See National Endowment for Financial Education, *supra* note 6.

FIGURE 1: States with required stand-alone personal finance course for high school graduation in the past 5 years plus TN and UT

FINDING #2 — States are using several methods to implement personal finance requirements, particularly in terms of credits required for high school graduation.

Most states that have required financial literacy in the past five years have reduced the number of electives to keep the same required number of high school credits for graduation. Some states, such as West Virginia, have simply increased the overall number of required credits. However, the significant upsurge in states including financial literacy as a high school graduation requirement is not happening in a vacuum. States also recognize the benefits of students learning career pathway skills, computer science skills and other curricula, which have recently been adopted as high school graduation requirements. This has created some conflict in West Virginia, where a bill to make computer science a high school graduation requirement was changed to give students the option to take personal finance or computer science as a high school graduation requirement. The bill did not pass. Nevertheless, states and schools are struggling with additions to—but lack of subtractions from—high school graduation requirements.

In a likely attempt to lessen the high school credit requirement pressure, 11 states have allowed a personal finance course to substitute for other high school graduation requirements. Concerningly, four of these states specifically authorize the substitution of personal finance with math credits, and an additional four states potentially allow the substitution for math credits. When we examined the postsecondary admission requirements for the flagship institutions in these states, none of them recognized financial literacy in their admission requirements. Accordingly, the substitution approach may raise additional concerns that students could be unwittingly putting future postsecondary and career choices at risk.

FINDING #3 — Some states are leading the way in terms of authenticating student learning of financial literacy concepts.

Alabama and Utah are state leaders in authentication of financial literacy in K-12. Both states require students to take a financial literacy assessment. Utah has required an assessment since the 2015-16 school year, while Alabama's assessment requirement was adopted in 2023. Other states require a financial literacy assessment but only for certain students. For example, Missouri requires students to take the financial literacy assessment if the students opt to complete the financial literacy requirement through an embedded course or courses and exempts students from the assessment if they take the stand-alone, personal finance course. Nevada requires a financial literacy assessment for students hoping to earn a State Seal of Financial Literacy on their high school diplomas. Maryland receives pre- and post-test results from school districts that use the EverFi personal finance curriculum. Michigan and Oklahoma allow students to use assessments to opt out of the financial literacy requirements.

FINDING #4 — States are using several methods to address teacher staffing in financial literacy.

Most states use some combination of career and technical education, social studies, economics or mathematics licenses/endorsements to teach personal finance courses. Some states allow any licensed educator to teach financial literacy. This likely reflects the availability of teachers to teach the personal finance course and the urgency with which state agencies find themselves needing to meet legislative requirements for financial literacy. Nonetheless, it raises the question of whether there should be some minimum level of credentialing, professional training or experience to teach financial literacy.

Some states are using innovative methods to upskill teachers to teach personal finance. For example, Rhode Island has partnered with Next Generation Personal Finance to provide professional development opportunities for educators teaching personal finance. Additionally, the state has identified 20 micro-credentials offered through Digital Promise, at no cost to teachers.¹¹ Utah has a specific credential for their financial literacy requirement, which is an outlier among states. Mississippi has partnered with the Mississippi Council of Economic Education to create a Master Teacher of Financial Literacy.¹² Other states offer or require professional development depending on the teacher's endorsement.

Recommendations

Recommendation #1 — States that have not prioritized financial literacy should consider requiring personal finance instruction for all students.

While significant progress has been made in bolstering financial literacy in K-12 in the past five years, a handful of states still do not require any personal finance instruction. These states should thoughtfully consider requiring financial literacy instruction. Within these states, some schools may locally require a personal finance course for high school graduation, which creates an opportunity for these states to compare financial literacy among students who are required to take a personal finance course and students who are not.

Recommendation #2 — States should be mindful of high school graduation requirements.

Decisions on what students should learn and know upon leaving high school should be pursued in a more holistic manner. For example, Indiana is redesigning high school by comprehensively evaluating state expectations for learning, even with the state recently adopting both computer science and financial literacy as high school graduation requirements.¹³ The addition of new high school graduation requirements without elimination of other requirements may reduce student opportunities to pursue career pathways, which in turn will put more pressure on core academic subjects. More seat time requirements may not produce better student outcomes; Indiana is considering flexible options for students to demonstrate required skills and competencies. Financial literacy is an important life skill. States should consider looking at creative ways to increase student interest and flexibility to demonstrate what they know and have learned, including financial literacy.

A comprehensive review of high school graduation requirements should include an analysis of the alignment of high school graduation requirements and postsecondary admission requirements. This is especially important for states that allow substitution of personal finance credits for math credits where colleges and universities may not recognize the substitution for admissions. Students need to be informed of the potential consequences of foregoing additional math to avoid barriers to future postsecondary training.

Recommendation #3 — States should carefully and creatively consider ways in which to authenticate student learning of financial literacy.

States should carefully consider ways in which to authenticate student learning of financial literacy skills, whether that is through assessment, project-based learning or some other method. Most states do not require authentication of student learning of financial literacy, leaving those states uncertain whether their efforts to make students more financially literate are working. This doesn't have to involve the state's accountability system. States can be creative here because there is a wealth of innovative financial literacy resources that can inform teachers and students quickly if students have learned personal finance concepts—and these resources can do so with minimal requirements on teachers.¹⁴

14 - 13 Financial Literacy Games for Children and Adults (Gamification Resources), Fitzsimons Credit Union, available at: <https://www.fitzsimonscu.com/financial-literacy-games-for-children-and-adults/>; Online Games and Apps That Teach Kids About Money, Washington State Department of Financial Institutions, available at: <https://dfi.wa.gov/financial-education/educators/online-games-and-apps>; Financial Literacy Assessment Tracks Change, National Financial Educators Council, available at: <https://www.financialeducatorsCouncil.org/financial-literacy-assessment/>

Recommendation #4 – States need to collect additional data to ensure high-quality teaching of financial literacy.

States need more data on financial literacy instruction. Many of the financial literacy requirements are new, and state agencies have had to make difficult decisions about which educators may teach personal finance. Now that states are in longer-term implementation, they should consider addressing the professional teaching requirements for financial literacy. To do this, states will need more data. Should states follow Utah's lead and create a specific financial literacy credential? Is there a right mix of endorsements, professional development or work experience that would provide a teacher with the tools to teach financial literacy? Many states offer resources but don't require financial literacy professional development for educators to teach personal finance. There are several organizations that offer professional development for financial literacy, such as the Council for Economic Education, Jump\$tart, and Next Generation Personal Finance. Should this kind of professional development be required? States will need data to help answer these questions.

Alabama

Access

In 2023, the state made financial literacy and money management a stand-alone course requirement beginning with public school students entering the ninth grade in 2024-25.¹⁵ Previously, financial literacy was offered through a required Career Preparedness Course, which focused on three integrated areas—academic planning and career development, technology and financial literacy.¹⁶

Graduation Requirements

Alabama students are required to complete a course in financial literacy to graduate from high school beginning with students entering ninth grade in the 2024-25 school year.¹⁷ Financial literacy has been a graduation requirement through a Career Preparedness Course since the high school graduating class of 2017. Alabama requires 24 total credits to graduate from high school.¹⁸ With the adoption of the financial literacy requirement, students will have 1.5 electives and three credits for which they must take career and technical education, foreign language or arts education courses.¹⁹

In 2024, the legislature enacted a bill that creates a new “Workforce Pathways” option for students to meet high school graduation requirements.²⁰ Under the new option, students are only required to complete two math and two science credits to earn their high school diploma.²¹ In lieu of the four credits each in math and science, students under the Workforce Pathways option may earn credits in career and technical education courses.²² The bill retains postsecondary institution authority to set their own admission requirements.²³

Core Course Substitution and Postsecondary Recognition

The Alabama Department of Education is required to identify financial literacy courses that may be used to satisfy one unit of academic credit for any mathematics course for high school graduation.²⁴

The state requires four math credits for high school graduation except for the new Workforce Pathways diploma option.²⁵ The University of Alabama requires three units of mathematics courses for admission, which should include algebra I, algebra II and one unit of geometry, trigonometry or calculus. Financial literacy is not a listed admission requirement or course substitution.²⁶

Financial Literacy Standards

Alabama embeds some personal finance standards in their economics standards within the social studies standards.²⁷ In first grade, students will “describe the role of money in everyday life,” including saving and borrowing.²⁸ In seventh grade, students learn about taxes, stocks, opportunity cost, and personal budgeting.²⁹

Teacher Credentialing

At the time of this report, the new financial literacy course could not be found in the course catalog along with the endorsements required to teach the course.

Other (Authentication)

As part of HB 164, the Alabama Department of Education must create a financial literacy assessment to be completed at the end of the financial literacy course. School districts are required to report student performance on the assessment to the department by the school system. The bill does not specify if the assessment will be reported as part of the state’s accountability system.

27 - 2010 Alabama Course of Study: Social Studies, AL Department of Education, available at: <https://www.alabamaachieves.org/wp-content/uploads/2021/03/2010-Alabama-Social-Studies-Course-of-Study.pdf>

28-29 - Id.

Alaska

Access

Alaska does not have a financial literacy course required to be offered by school districts.

In the 2023 and 2024 legislative sessions, a bill was filed that would have created a stand-alone, financial literacy course for students in grades 9-12.³⁰ The bill was subsequently amended to require a financial literacy education program that school districts could offer through one or more courses.³¹ Financial literacy instruction would be required for high school graduation purposes.³² However, the bill did not ultimately pass in 2024.

Graduation Requirements

Not required.

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

K-8 financial literacy standards were not found. The social studies standards are reportedly in the revision process as of spring 2023.³³

Teacher Credentialing

A specific financial literacy endorsement could not be found.

30 - SB 99 (2023), available at: <https://www.akleg.gov/basis/Bill/Detail/33?Root=SB99>

31-32 - Id.

33 - Alaska Standards and Instruction, AK Department of Education and Early Development, available at: <https://education.alaska.gov/standards>

Arizona

Access

In 2019, the legislature directed the State Board of Education to require at least a one-half course credit in Economics, which must include financial literacy and personal financial management.³⁴

Graduation Requirements

The half-credit course in Economics, which incorporates financial literacy, is a high school graduation requirement.³⁵ Students are required to complete 22 credits to graduate from high school with certain exceptions.³⁶

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Arizona explicitly includes financial literacy in the Economics Core Discipline Standards in several grade bands through K-8.³⁷ Financial literacy standards include reasons to save or spend money (grades 1-2), incentives that influence financial decisions (grade 3), opportunity cost and risk (grade 4), individual and household risk (grades 5-6) and ultimately, interest rates, credit, investment returns and budgeting (grade 8).³⁸

Teacher Credentialing

Teachers need a secondary certificate with approval in the areas of Economics, Business or Social Studies.³⁹

34 - SB 1184 (2019), available at: <https://www.azleg.gov/legtext/54leg/1R/laws/0084.pdf>

35 - Id.

Arkansas

Access

In 2017, the legislature required students to earn credit in a course that incorporates personal and family finance standards, beginning with students entering the ninth grade in the 2017-18 school year.⁴⁰

Graduation Requirements

Students must complete a course that includes Personal and Family Finance Standards to graduate from high school.⁴¹ The Arkansas Department of Education aligned and embedded the personal finance standards into six courses: Financial Literacy, Quantitative Literacy, AP Macro Economics and Personal Finance, AP Micro Economics and Personal Finance, Economics, and Financial Planning.⁴² Districts may also submit other courses for approval with the embedded financial literacy standards.⁴³ Students must also take a department-approved Economics and Personal Finance course to graduate from high school.⁴⁴ In all, the state requires 22 credits to graduate from high school.⁴⁵

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

There appears to be few standards covering financial literacy in the social studies academic standards in K-8.

Teacher Credentialing

There does not appear to be a specific credential or endorsement for financial literacy. Instead, the Economics with Personal Finance course could be taught by teachers with licensure in business education, marketing, economics, social studies or marketing/business technology.⁴⁶ However, the state does provide professional development opportunities for teachers for personal finance through ArkansasIDEAS, a partnership between the Arkansas Public Broadcast System and the Arkansas Department of Education.⁴⁷

California

Access

In 2024, the legislature approved a stand-alone personal finance course for students graduating in the 2030-31 school year.⁴⁸ With the approval of the requirement by the state, proponents of a ballot initiative to require a stand-alone personal finance course beginning with the graduate cohort of 2029-30 will withdraw their proposal.⁴⁹

Graduation Requirements

Beginning with the 2030-31 graduating cohort, students will be required to complete a stand-alone personal finance course for high school graduation.⁵⁰

Core Course Substitution and Postsecondary Recognition

Students who complete the personal finance course may choose to be exempt from the Economics requirement for high school graduation.⁵¹

K-8 Financial Literacy Standards

The K-8 standards currently do not include many, if any, financial literacy standards.

Teacher Credentialing

Teachers with credentials in social science, business, mathematics or home economics may teach the personal finance course.⁵²

Colorado

Access

The state's high school social studies standards include financial literacy.⁵³ The state "encourages" school districts to adopt financial literacy curricula.⁵⁴

Graduation Requirements

In Colorado, school districts establish high school graduation requirements.⁵⁵ The Colorado State Board of Education adopts high school graduation guidelines but is not allowed to identify specific courses, with certain exceptions.⁵⁶ The Graduation Guidelines include the Individual Career and Academic Plan (ICAP), which is a plan for students and families to explore academic, career and postsecondary opportunities.⁵⁷ ICAP includes financial literacy as a quality indicator.⁵⁸ However, there isn't a financial literacy course that is required for high school graduation. Roughly 25% of school districts require personal finance in district-approved, high school graduation requirements.⁵⁹

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Financial literacy instruction is one of the five standards of Social Studies instruction that students receive in Colorado from pre-K through grade 8.⁶⁰ Pre-K students learn how money is used and earned.⁶¹ In kindergarten, students are introduced to the basics of financial decision making given limited resources and learn the distinction between wants and needs.⁶² First grade students learn about different types of currency, such as cash, credit and debit cards.⁶³ Second graders learn about assessing financial priorities and solving simple financial decisions.⁶⁴ In third grade, students learn how to meet financial goals and the basics of budgeting.⁶⁵

Connecticut

Access

In 2023, the legislature required a one-half credit in personal financial management and financial literacy as a stand-alone, financial literacy course for the high school graduating cohort of 2027.⁷²

Graduation Requirements

The 2023 legislation made the stand-alone, financial literacy course as a high school graduation requirement for the high school graduating cohort of 2027.⁷³

Core Course Substitution and Postsecondary Recognition

The financial literacy course may count as one of the nine credits required in humanities, civics and the arts.⁷⁴ The state requires 25 credits for high school graduation.⁷⁵ The University of Connecticut first-year admission requirements do not reference financial literacy or the humanities high school graduation requirements.⁷⁶ Instead, first-year admissions require four years of English and two years of social studies.⁷⁷

K-8 Financial Literacy Standards

The state's social studies standards were updated in 2023; however, the standards reference economics concepts rather than personal finance concepts.⁷⁸

Teacher Credentialing

There are several different endorsements that teachers can use to teach Financial Literacy: Business (grades 7-12); History and Social Studies (grades 7-12); Social Studies (grades 7-12) (new endorsements no longer issued); History and Social Studies (grades 7-9) (new endorsements no longer issued); Mathematics (grades 7-12); Home Economics (grades PreK-12); Marketing Education (grades 7-12); and Cooperative Work Education/Diversified Occupations.⁷⁹

Florida

Access

The 2022 legislature required a stand-alone, course in personal financial literacy and money management.⁸¹

Graduation Requirements

Students entering grade 9 in the 2023-24 school year must earn one-half credit in personal financial literacy and money management.⁸² Students must complete 24 credits for high school graduation.⁸³

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

In the social studies standards for grade 8, there are several strands relating to financial literacy, including earning income, purchasing, saving, using credit, financial investing and protecting and insuring.⁸⁴ There are other financial literacy concepts embedded in the economic strands within the K-8 social studies standards.⁸⁵ For example, in first grade, students would learn the importance of saving money for future purchases.⁸⁶ Second grade students learn the personal benefits and costs in saving and spending.⁸⁷

Teacher Credentialing

The state's curriculum framework specifies teachers with certifications in business education or family consumer sciences can teach the financial literacy course.⁸⁸

Georgia

Access

The 2022 legislature required a half-credit course in financial literacy for 11th or 12th grade students beginning with the 2024-25 school year.⁸⁹ The course may be provided within the framework of existing coursework offered by school districts.⁹⁰ In 2021, the State Board of Education revised the Economics course required for graduation to become the Personal Finance and Economics course.⁹¹

Graduation Requirements

The half-credit course is a high school graduation requirement beginning with the class of 2028.⁹² Students are required to take 23 credits to graduate from high school, including a half-credit in Personal Finance and Economics.

Core Course Substitution and Postsecondary Recognition

The financial literacy course of instruction may count as a math, social studies or elective requirement.⁹³ The University of Georgia first-year admission requirements do not reference financial literacy or its substitution for other courses.⁹⁴

K-8 Financial Literacy Standards

Personal finance concepts are part of the social studies standards for grades K-8. Examples include the elements of a personal budget, spending and saving in grades 4 and 5, and the uses and costs of credit in grades 6 and 8.⁹⁵

Teacher Credentialing

The bill directed the Professional Standards Commission (PSC) to establish the requirements for teaching financial literacy and includes secondary level certificates in business, economics, mathematics, family consumer science, marketing, special education certificate with social science content designations, or a secondary teaching endorsement in financial literacy designated by the PSC.⁹⁶ The PSC provided additional guidance to teacher preparation programs for financial literacy endorsement on standards relating to the Fundamentals of Economic Decision Making, Personal Finance, Microeconomics, Macroeconomics, and International Economics.⁹⁷

Idaho

Access

In 2023, the legislature required school districts to provide to all students in grades 9-12 one or more courses in personal financial literacy and money management.¹⁰⁰ The law does not specify a stand-alone course. Additionally, students can access a financial literacy course through the Idaho Digital Learning Alliance.¹⁰¹

Graduation Requirements

The Idaho State Board of Education specifies that students must earn a minimum of 46 credits to graduate from high school with five credits in social studies—one of those five credits is economics and financial literacy.¹⁰² Students can meet the high school graduation requirement through the revised economics and financial literacy course or through two separate courses in economics and financial literacy.¹⁰³

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Some personal finance concepts are covered in grades K-8. For example, in grades 1-3, students learn ways to save money and the benefits of savings.¹⁰⁴ Students in fourth grade learn about entrepreneurship and the reasons for starting a business.¹⁰⁵ Fifth grade students add to their knowledge about entrepreneurship and learn about the impact of taxation on personal finances.¹⁰⁶ There appears to be very limited financial literacy content for grades 6-8.¹⁰⁷

Teacher Credentialing

The Idaho Department of Education has authorized endorsements in the following subject areas to teach the revised economic and financial literacy course: Social Studies (grades 6-12), Economics (grades 6-12), Social Studies – Middle Level (grades 5-9), Economics (grades 5-9), or a Public Charter School Teacher endorsement.¹⁰⁸ Additionally, certain career and technical education teachers may be able to teach the revised course.¹⁰⁹ If financial literacy is a stand-alone course, a standard state instructional certificate-holder may teach the course in the transitional year.¹¹⁰

Illinois

Access

Students must be taught courses that include consumer education, which includes the basic concepts of financial literacy.¹¹¹ In 2023, the Illinois House of Representatives approved a bill that would have made financial literacy a stand-alone course required for high school graduation beginning with students entering the ninth grade in 2027-28.¹¹² However, the Illinois Senate substantially altered the bill to conform to the current consumer education requirement in 2024.¹¹³ Ultimately, the bill has not passed.

Graduation Requirements

Illinois high school graduation requirements do not specifically include financial literacy. Students can use a financial literacy course to satisfy part of the two years required for social science.¹¹⁴ However, students must be taught courses that include instruction in consumer education, including the basic concepts of financial literacy.¹¹⁵

Core Course Substitution and Postsecondary Recognition

If a student can take an offered financial literacy course, it may count toward their social studies graduation requirement.¹¹⁶

K-8 Financial Literacy Standards

Financial literacy instruction is embedded in the Social Science content standards.¹¹⁷ For example, first graders learn how people earn income from work.¹¹⁸ Second graders learn about savings.¹¹⁹ Third graders describe the role of banks and other financial institutions and learn about borrowing.¹²⁰ Fourth graders learn about the role of prices in influencing spending choices.¹²¹ Fifth graders learn about interest.¹²² Finally, students in grades 6-8 learn about credit history, credit options, financial risk, investment options and budgeting.¹²³

Teacher Credentialing

A specific endorsement or credential for consumer education instruction or financial literacy could not be found.¹²⁴ Instead, teachers of consumer education instruction would need to hold licensure for the grade level taught (where the instruction is embedded) and have completed at least three semester hours in consumer education courses.¹²⁵

Indiana

Access

In 2023, the legislature approved a bill that requires personal financial responsibility as a stand-alone course beginning in 2028.¹²⁶ Until 2028, current law requires high schools to include instruction in personal financial responsibility.¹²⁷

Graduation Requirements

Beginning in 2028, the stand-alone course in personal financial responsibility is a high school graduation requirement.¹²⁸ Students in Indiana are required to take a minimum of 40 credits to graduate from high school.¹²⁹ As part of recent legislation, the Indiana Department of Education is currently revising high school graduation requirements.¹³⁰

Core Course Substitution and Postsecondary Recognition

The State Board of Education may allow the personal financial responsibility course to satisfy one or more diploma requirements.¹³¹

K-8 Financial Literacy Standards

Indiana embeds some financial literacy into their K-8 curriculum Social Studies standards. For example, in second grade, students learn about the concept of savings.¹³² In third grade, they learn the different ways people save their income, and explain advantages and disadvantages of each.¹³³ In fifth grade, students learn about personal budgeting.¹³⁴ In sixth grade, students would compare investing options.¹³⁵ By the end of the eighth grade, students are expected to plan and manage money, manage credit and debt, analyze risk and understand saving and investing.¹³⁶

Teacher Credentialing

Any grade 5-12 secondary educator with valid licensure who has financial, math or business professional development training or work experience may teach the Personal Financial Responsibility course.¹³⁷ There are additional licensure options for an equivalent Personal Finance and Banking course in the Finance and Investment Program of Study.¹³⁸

¹³⁸ - Id.

Access

The 2023 legislature revised the stand-alone, financial literacy course requirement for students, allowing schools to offer the course to students through a stand-alone course or embedded within other subject areas.¹³⁹

Graduation Requirements

One-half unit of personal finance literacy is required to graduate from high school.¹⁴⁰

Core Course Substitution and Postsecondary Recognition

Financial literacy can be its own stand-alone graduation requirement or be embedded in science, social studies, English, math, or career and technical education courses.¹⁴¹

K-8 Financial Literacy Standards

Iowa embeds financial literacy standards in its social studies standards for K-8. For example, in kindergarten, students explain the difference between buying and borrowing.¹⁴² In second grade, students evaluate the benefits and consequences of spending and saving.¹⁴³ Third graders learn about an individual's responsibility for credit and debt.¹⁴⁴ Fifth graders learn about financial risk.¹⁴⁵ Sixth graders learn about spending and saving, the differences between debit and credit cards and the advantages of various saving tools.¹⁴⁶ Seventh graders are introduced to investment vehicles and concepts.¹⁴⁷ Eighth graders learn about budgeting and risk.¹⁴⁸

Teacher Credentialing

For the stand-alone, financial literacy course (course code 22900), teachers could be licensed in grades 5-12 in Economics, Social Sciences, Business, Family and Consumer Sciences and Mathematics.¹⁴⁹

Kentucky

Access

In 2018, the legislature adopted a requirement for the entering ninth grade class in 2020-21 to complete one or more courses that meet the financial literacy standards adopted by the State Board of Education.¹⁵⁵ School districts determine how financial literacy is taught—stand-alone or an integrated course.

Graduation Requirements

Financial literacy is a high school graduation requirement.¹⁵⁶ Students must complete 22 credits to graduate from high school.¹⁵⁷ Kentucky allows students to meet the financial literacy graduation requirement through four options: (1) Money Skills (201010) or Personal Finance (060170) if the student chooses the Business or Family and Consumer Science pathway; (2) Money Skills for Mathematics (201011) or Personal Finance (080719) with these courses simultaneously conferring math credit; (3) dual credit/articulated credit through a partnership between a school district and a postsecondary institution; or (4) a program or combination of course offerings through a variety of instructional formats developed by schools.¹⁵⁸

Core Course Substitution and Postsecondary Recognition

Students may complete the financial literacy course requirement through a math course (Money Skills for Mathematics (Course code 201011) or Personal Finance (Course Code 080719)), which would confer math credit to meet the personalized math credits required for high school graduation.¹⁵⁹ Freshman admissions at the University of Kentucky requires students to have completed three credits in math (Algebra I, Geometry or more rigorous math courses).¹⁶⁰

K-8 Financial Literacy Standards

Kentucky's financial literacy standards are embedded in Career Studies in K-8, which consist of three strands—essential skills, careers and financial literacy—across three grade bands: K-3, grades 4-5 and grades 6-8.¹⁶¹ In K-3, students begin to learn about buying and borrowing, financial decisions on short- and long-term goals and ways to save money.¹⁶² In grades 4-5, students learn to identify the ways people earn income, how credit is used, develop a budget, compare payment instruments and identify the purpose of insurance.¹⁶³ In grades 6-8, students learn about investments, compare credit sources and develop financial goals.¹⁶⁴

Teacher Credentialing

Educator credentialing for financial literacy instruction is dependent on the option that the school district chooses to meet the high school graduation requirement. For example, the Personal Finance course (Mathematics Credit—080719) has roughly 80 separate credentials authorized for teaching the course.¹⁶⁵

¹⁶⁵ - See Course Search, KY Department of Education, available at: <https://kecs.education.ky.gov/public/coursesearch>

Louisiana

Access

The 2023 legislature approved a stand-alone, financial literacy course requirement beginning with students who enter the ninth grade during the 2024-25 school.¹⁶⁶

Graduation Requirements

The one-unit, stand-alone, financial literacy course is required for high school graduation beginning with students who enter the ninth grade during the 2024-25 school year.¹⁶⁷ The state offers two separate diplomas. The Taylor Opportunity Program for Students (TOPS) University diploma now requires one unit of financial literacy. The state's career-focused diploma, TOPS Tech, adds the one-unit, financial literacy requirement as part of the four math units required for the diploma.¹⁶⁸ The TOPS University diploma requires 24 credits and TOPS Tech 23 units to graduate.¹⁶⁹

Core Course Substitution and Postsecondary Recognition

The TOPS Tech diploma has financial literacy as one of the four math credits required for the diploma.¹⁷⁰

K-8 Financial Literacy Standards

Very few financial literacy concepts were found in the economics sections in the Social Studies Standards for K-8. For example, students in grade 3 learn the importance of personal financial decision-making, such as budgeting and savings.¹⁷¹

Teacher Credentialing

Any certified teacher can teach Financial Literacy (Course Code 160345).¹⁷²

Maine

Access

The state requires students to complete instruction in personal finance in separate or integrated study programs.¹⁷³ A bill was introduced in 2023 to make the instruction in personal finance as a stand-alone course.¹⁷⁴ However, the bill was amended to remove the stand-alone course requirement and directed the Commissioner of Education to include personal finance in content areas other than social studies.¹⁷⁵

Graduation Requirements

To graduate from high school, students must complete two years of social studies and history instruction (as opposed to courses), including American history, government, civics and personal finance or the equivalent in standards achievement.¹⁷⁶

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Maine embeds personal finance and economics into their social studies content standards for kindergarten through eighth grade.¹⁷⁷ For example, students in grades 1-3 learn about the use of money.¹⁷⁸ Students in grades 4-5 learn about managing money through financial institutions.¹⁷⁹ Students in grades 6-8 learn about spending and savings decisions as they relate to individual financial choices.¹⁸⁰

Teacher Credentialing

A specific endorsement or credential for financial literacy was not found.

Maryland

Access

School systems are required to offer a program of instruction in financial literacy education for students in the elementary, middle and high school grades.¹⁸¹ The school systems must certify compliance with the requirement every five years.¹⁸²

Graduation Requirements

There is not a state requirement for financial literacy for high school graduation.¹⁸³ However, eight or nine school systems in the state do require financial literacy for high school graduation.¹⁸⁴ The remaining school systems integrate financial literacy into other subject areas.¹⁸⁵

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Maryland has created financial literacy standards for K-8 through two grade bands: K-5 and grades 6-8.¹⁸⁶ The standards list what students would be expected to know by the end of grade 5 and grade 8.¹⁸⁷ There are six standards: (1) make informed, financially responsible decisions; (2) relate careers, education and income; (3) plan and manage money; (4) manage credit and debt; (5) create and build wealth; and (6) manage risks and preserve wealth.¹⁸⁸

Teacher Credentialing

A specific credential or endorsement for financial literacy was not found.

Other (Authentication)

Maryland receives an annual report from EverFi for every school system that uses EverFi for its financial literacy resources with pre- and post-test results.¹⁸⁹ Everfi is a company that provides custom financial education for K-12 students.

Massachusetts

Access

A requirement to offer a stand-alone or integrated financial literacy course was not found. The state has created financial literacy standards at the high school level¹⁹⁰, which schools may incorporate into existing curriculum.¹⁹¹

Graduation Requirements

Financial literacy is not a high school graduation requirement.¹⁹²

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Basic economics and financial literacy concepts are addressed in the social studies K-2 standards encompassing income and savings.¹⁹³ Financial literacy standards could not be found in grades 3-8.¹⁹⁴

Teacher Credentialing

A specific credential or endorsement for teaching financial literacy could not be found.¹⁹⁵

Other (Authentication)

The Office of Economic Empowerment released a report in the state in 2021 that surveyed teachers on financial literacy in K-12.¹⁹⁶ In the surveys, the vast majority of school districts reported that they do not require schools to teach financial literacy (73% of respondents) or offer financial literacy as an elective (60% of respondents).¹⁹⁷ Teaching financial literacy is most often found at the high school level.¹⁹⁸ The Office found 85% of responding high schools and over 95% of high school programs of study have at least one course with financial literacy content in it.¹⁹⁹

Michigan

Access

In 2022, the legislature approved a stand-alone, financial literacy course that must be completed by all students, or an equivalent career and technical education program or curriculum (students entering eighth grade in 2023 and thereafter).²⁰⁰ The Michigan Department of Education released additional guidance, which appears to indicate that a half-credit financial literacy course, a full-credit economics course made up of one-half credit economics and one-half credit of personal finance, or embedded personal finance in another disciplinary course or career and technical education course/program would satisfy the financial literacy requirement.²⁰¹

Graduation Requirements

Beginning with students entering eighth grade in 2023, students must complete a half-credit course in personal finance or a student can fulfill the requirement through a department-approved career and technical education program or curriculum that aligns with the financial literacy standards approved by the Michigan State Board of Education.²⁰² Despite the inclusion of the financial literacy requirement, the state's high school graduation requirements remain at 18 credits.²⁰³

Core Course Substitution and Postsecondary Recognition

The financial literacy half-credit course counts as a half-credit of math, half-credit of visual, performing or applied arts, or a half-credit in another language as determined by the school district.²⁰⁴ The University of Michigan highly recommends three years of math for freshman admissions.²⁰⁵ Financial literacy is not referenced.

K-8 Financial Literacy Standards

There are some financial literacy concepts embedded in the social studies content standards.²⁰⁶ For example, students in second grade learn about analyzing the costs and benefits of a personal decision.²⁰⁷ Third graders learn about economic incentives and their impact on spending decisions and entrepreneurship.²⁰⁸ Fourth grade students learn more about positive and negative economic incentives, the impact of price on financial decisions and taxes.²⁰⁹ Sixth graders learn more about economic incentives.²¹⁰

Teacher Credentialing

There is no specific code or endorsement for the personal finance course.²¹¹ The Michigan Department of Education released guidance to help school districts and teachers.²¹² This guidance provided that a teacher must hold a valid state teaching certificate to teach the financial literacy course.²¹³ In addition, depending on the course content focus, additional endorsements may be required: (1) math focus—math endorsement; (2) family planning and life skills—family and consumer science endorsement; (3) accounting, budgeting and business planning—business education endorsement; and (4) economic systems and finance—economics, social studies or social science endorsement.²¹⁴

Other (Authentication)

The Michigan Department of Education does allow students to test out of the financial literacy requirements.²¹⁵ Eligible assessments include those adopted by the state or one or more assessments adopted by a school district as long as the standards are met.²¹⁶

Minnesota

Access

The 2023 legislature approved a requirement for students to take a stand-alone, one-credit course in personal finance in grades 10, 11 or 12 beginning with students entering grade 9 in the 2024-25 school year.²¹⁷ The course aligns with certain career and technical education programs areas, such as Business and Family and Consumer Science.²¹⁸

Graduation Requirements

The one credit in financial literacy is a high school graduation requirement for students entering grade 9 in the 2024-25 school year and thereafter.²¹⁹ Students must earn 22.5 credits to graduate from high school with the addition of the financial literacy credit requirement.²²⁰

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Minnesota embeds financial literacy concepts in its social studies standards.²²¹ Social studies standards were adopted in 2024 with full implementation scheduled for the 2026-27 school year.²²² For example, in grades 2, 3 and 5, students will learn to develop individual financial goals.²²³ Sixth grade students will learn how to create a budget.²²⁴

Teacher Credentialing

The personal finance course can be taught by licensed teachers in agricultural education, business education, family and consumer science, social studies, math or through an out-of-field permission in one of these fields.²²⁵

Mississippi

Access

The graduating class of 2022 was the first class required to take the Mississippi College and Career Readiness course (CCR).²²⁶ The CCR course is a full-year course with one semester devoted to financial literacy. A bill was introduced in 2024 to make financial literacy a stand-alone course.²²⁷ However, the bill did not advance.²²⁸

Graduation Requirements

The CCR course is a high school graduation requirement, which makes financial literacy a high school graduation requirement in the state.²²⁹ Mississippi has a traditional diploma (24 credits) with optional endorsements—Career and Technical Education Endorsement (26 credits), Academic Endorsement (26 credits) and a Distinguished Academic Endorsement (28 credits).²³⁰ The state allows students to substitute coursework for the CCR requirement—Career and Technical Work-Based Learning Course, Dual Credit SmartStart, JROTC III and IV, Advanced Placement Capstone or equivalent International Baccalaureate or Cambridge courses or College and Career Readiness Seminar courses for early college high schools.²³¹

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

The state embeds few financial literacy concepts in the economics strand of the state's social studies standards.²³² For example, in kindergarten, students learn about income and the difference between saving and spending.²³³ In second grade, they learn about the role various financial institutions play in the community.²³⁴

Teacher Credentialing

Any teacher with a valid grades 7-12 license may teach the CCR course.²³⁵ Additionally, the state has worked with the Mississippi Council on Economic Education, which has developed a Master Teacher of College and Career Readiness and a Master Teacher of Personal Finance course.²³⁶

Missouri

Access

Beginning with the class of 2010, students are required to take a half-unit of personal finance.²³⁷ Students may take the personal finance course, take personal finance through an embedded course, or test out of the personal finance requirement.²³⁸ If a student chooses the personal finance course, the Personal Finance Assessment is optional.²³⁹ If the student chooses the embedded option, the student must take the assessment but passage is a district decision.²⁴⁰ If the student attempts to opt out of the requirement, the student must score 90% or higher on the assessment.²⁴¹

Graduation Requirements

Students in Missouri are required to complete a half-unit in personal finance to graduate from high school.²⁴² Students must complete a minimum of 24 credits to graduate from high school.²⁴³

Core Course Substitution and Postsecondary Recognition

The personal finance course may count as a social studies credit, practical arts credit or elective.²⁴⁴

K-8 Financial Literacy Standards

There are few financial literacy concepts embedded in the social studies standards. For example, in second grade, students learn to describe a personal cost-benefit situation and then analyze that situation in third grade.²⁴⁵

Teacher Credentialing

Any certified teacher in the state is authorized to teach the personal finance course, although professional development opportunities exist, including through the Federal Reserve Bank of St. Louis and University of Missouri-St. Louis, which offer a postsecondary certificate.²⁴⁶

Other (Authentication)

Missouri has an online Personal Finance Assessment.²⁴⁷ The assessment is optional for students who take the stand-alone, personal finance course and required for students who take personal finance through an embedded course.²⁴⁸

Montana

Access

In 2023, the Montana Board of Education revised the high school graduation requirements to add a one-half unit of economics or one-half unit of financial literacy.²⁴⁹ There doesn't appear to be any requirement for schools to offer the one-half unit of financial literacy.

Graduation Requirements

Students have the option of selecting a one-half unit of economics or one-half unit of financial literacy as a high school graduation requirement, assuming they are both offered by a school district.²⁵⁰ Students are required to complete a minimum of 20 units to graduate.²⁵¹

Core Course Substitution and Postsecondary Recognition

The economics or financial literacy graduation course can count toward the two units of math, two units of social studies, or one unit of career and technical education credit requirements.²⁵² The University of Montana requires applicants to complete three years of math, including Algebra I, Geometry and Algebra II for freshman admissions.²⁵³ This exceeds the two units of math required for high school graduation and does not reference financial literacy as an acceptable substitute.²⁵⁴

K-8 Financial Literacy Standards

There are few financial literacy concepts embedded in the social studies standards.²⁵⁵ For example, in third grade, students learn about the benefits and costs of individual choices. Students are not exposed to financial literacy instruction until high school.²⁵⁶

Teacher Credentialing

Although there are specific endorsements for finance courses in career and technical education programs, there does not appear to be a specific endorsement for financial literacy.²⁵⁷

Nebraska

Access

The 2021 legislature approved a stand-alone, financial literacy requirement for students beginning in the 2023-24 school year.²⁵⁸ The Nebraska Department of Education has issued guidance that identifies three courses in which the financial literacy requirements could be met—Personal Finance (033000), Wealth Building Fundamentals (033002) or Life and Career Readiness (090104).²⁵⁹ However, school districts have the discretion to determine which course would satisfy the requirement as long as all the financial literacy components are met.²⁶⁰

Graduation Requirements

The five-credit financial literacy course is a requirement for high school graduation beginning in the 2023-24 school year.²⁶¹ Students must earn 200 credits to graduate from high school.²⁶²

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

As part of the 2021 legislation, the Nebraska Department of Education was directed to adopt academic content standards for financial literacy as part of the social studies standards.²⁶³ Additionally, school districts were directed to include financial literacy instruction in the elementary and middle school grades and issue an annual status report to the school board on financial literacy.²⁶⁴

The state's social studies standards predate the financial literacy legislation. Nonetheless, financial literacy concepts are embedded in the current standards.²⁶⁵ For example, in kindergarten, students learn to recognize money and explain the purposes of money.²⁶⁶ In first grade, students learn to compare spending and saving opportunities.²⁶⁷ Second graders learn about making transactions using currency.²⁶⁸ In third grade, students learn to evaluate choices and consequences for spending and saving under a budget.²⁶⁹ Fourth graders learn about financial institutions.²⁷⁰ Finally, in eighth grade, students learn to understand financial management, including budgeting, credit, investing and risk.²⁷¹

Teacher Credentialing

A specific endorsement for teaching financial literacy could not be found.²⁷²

Nevada

Access

The 2023 legislature approved legislation that specifically integrated economics and financial literacy.²⁷³ In 2017, legislation passed that specified that one-half unit in Economics was part of the three units required in social studies.²⁷⁴ There are 13 standards in financial literacy at the high school level, but it isn't clear if these standards are covered by a particular course or set of courses.²⁷⁵

Graduation Requirements

One-half unit of economics and financial literacy is required for high school graduation.²⁷⁶ Nevada has two general high school diplomas, both requiring Economics and Financial Literacy.²⁷⁷ The Standard Diploma requires 23 credits, while the Advanced Diploma requires 24 credits.²⁷⁸

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Financial literacy concepts are embedded in the state's social studies standards.²⁷⁹ For example, beginning in grade 3, students learn about saving and spending.²⁸⁰ In fourth grade, students learn about financial institutions and the consequences of sharing personal information with others.²⁸¹ In grade 5, students learn about setting financial goals and interest rates.²⁸² In grades 6-8, students learn about financial decision-making, personal budgeting, credit and debt, and insurance and investing.²⁸³

Teacher Credentialing

A specific endorsement for teaching financial literacy could not be found.²⁸⁴

Other (Authentication)

The state offers a Seal of Financial Literacy for the high school diploma.²⁸⁵ Students must meet certain GPA and assessment criteria.²⁸⁶ Specifically, a student must earn a score of 85% on a Financial Literacy Assessment provided by the Nevada Department of Education.²⁸⁷

Access

School districts must ensure that personal finance literacy instruction is taught as part of the curriculum, which may be embedded in an existing course or grade-level program of studies.²⁸⁸

Graduation Requirements

Students are required to complete a minimum of 20 credits to graduate with a half-credit in Economics, including personal finance.²⁸⁹ There is one personal finance standard in the Economics course relating to personal finance—money management, spending credit, saving and investing.²⁹⁰

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

The current social studies standards predate the 2022 legislation.²⁹¹ Financial literacy is covered in grades 7-8 in the social studies standards, including differences between accounts at financial institutions, income, saving and investing and the design of a financial plan.²⁹²

Teacher Credentialing

A specific endorsement for teaching personal finance could not be found.

Other (Authentication)

The New Hampshire State Board of Education approved a Learn Everywhere program that partners with PragerU, which allows students to obtain their financial literacy requirement for high school graduation.²⁹³

New Jersey

Access

Students are required to complete 2.5 credits (half-year) in Financial, Economic, Business and Entrepreneurial Literacy.²⁹⁴ To meet this requirement, students may complete a stand-alone, half-year course based on performance expectations from New Jersey Student Learning Standard 9.1 Personal Financial Literacy, individualized student learning opportunities, such as through independent study or structured learning experiences, or complete one or more elective courses that integrate the content and skills required in the stand-alone course.²⁹⁵

Graduation Requirements

Students must complete 2.5 credits in Financial, Economic, Business, and Entrepreneurial Literacy out of 120 credits to graduate from high school.²⁹⁶ The goal of the course is, in pertinent part, to ensure students develop personal finance skills.²⁹⁷ The course includes New Jersey Student Learning Standard 9.1 Personal Financial Literacy.²⁹⁸ Accordingly, financial literacy is a high school graduation requirement.

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Financial literacy concepts are addressed through Career Readiness, Life Literacies and Key Skills standards.²⁹⁹ The standards are arranged by what a student should know by the end of grades 2, 5 and 8 for K-8.³⁰⁰ For example, by the end of second grade, students learn the different values, uses and forms of money, the definition of a budget and saving money as a habit.³⁰¹ By the end of fifth grade, students learn about creating a budget, saving money for long-term and short-term goals and the differences among financial institutions and saving.³⁰² By the end of eighth grade, students learn values and emotions in financial behavior, suitability of financial institutions for financial needs, taxes, establishing financial goals and budgeting and credit.³⁰³

Teacher Credentialing

The Financial, Economic, Business and Entrepreneurial Literacy course can be taught by staff holding certificates in Social Studies; Business: Finance, Economics, and Law; Comprehensive Business, Comprehensive Family and Consumer Sciences; General Business (no longer issued for new personnel) or Math.³⁰⁴ Integrated courses that combine financial literacy with other subjects must also be taught by staff with the same certificates.³⁰⁵

New Mexico

Access

Financial literacy may be a stand-alone course or offered in an integrated subject area. Previously, financial literacy was required to be offered by schools as an elective.³⁰⁶ An attempt was made in 2024 to make the financial literacy a stand-alone course, but it did not advance.³⁰⁷

Graduation Requirements

Students entering the ninth grade in 2025-26 will be required to have financial literacy as a high school graduation requirement through the four credits of social science required for graduation.³⁰⁸ However, a specific financial literacy course is not designated. Students must complete 24 credits to graduate from high school.³⁰⁹ The high school Economics course contains 13 strands related to personal financial literacy.³¹⁰

Core Course Substitution and Postsecondary Recognition

The 2024 legislation allows financial literacy to count as a mathematics credit, of which four are required for high school graduation.³¹¹ The University of New Mexico freshman admission requirements specify that a standard high school curriculum from the state is required for admissions.³¹²

K-8 Financial Literacy Standards

Financial literacy concepts are embedded in the social studies standards.³¹³ For example, kindergarteners learn about personal finance choices people make.³¹⁴ First graders learn about earning money through work.³¹⁵ In second grade, students learn to assess financial priorities and classify financial goals.³¹⁶ In third grade, students learn to create a plan to reach a short-term, financial goal.³¹⁷ Fourth graders learn about banks, checking and savings accounts.³¹⁸ In fifth grade, students learn about opportunity costs and tracking expenditures and savings.³¹⁹ Sixth graders learn about financial risk.³²⁰ In seventh grade, students learn about investing.³²¹ Finally, in eighth grade, students learn about compounding and investing.³²²

Teacher Credentialing

A specific endorsement for teaching financial literacy could not be found.³²³

New York

Access

The state integrates financial literacy concepts in its course, Economics, the Enterprise System, and Finance.³²⁴

Graduation Requirements

New York has several standard diploma options, all of which require 22 credits and include one-half credit in Economics to graduate from high school.³²⁵ The state recommends a grade 12 course, Economics, the Enterprise System, and Finance, to meet the Economics requirement. This course contains four standards relating to financial literacy.³²⁶

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

The state embeds economics standards in the social studies standards for grades K-4.³²⁷ Few of the standards are related to personal finance. However, students in grades 7 and 8 are required to take 1.75 units of career and technical education.³²⁸ The state has created a curricular guidance framework that includes a Financial and Consumer Literacy module.³²⁹ The module includes personal finance concepts such as earning income, saving and investing, risk and insurance, buying goods and services, payment options and credit, and careers in financial and consumer services.³³⁰

Teacher Credentialing

A specific endorsement for financial literacy could not be found. As part of the middle level CTE requirement, the New York State Education Department issued guidance on the teaching requirements for the courses, allowing any New York State certified CTE teacher to teach the courses but clarifying that the teacher must teach within their CTE content area.³³¹

North Carolina

Access

The 2019 legislature made a credit course in Economics and Personal Finance a requirement for all students.³³² The standards adopted by the North Carolina Department of Instruction for the course include personal finance standards relating to money and credit management, financial planning and critical consumerism.³³³

Graduation Requirements

Students must complete a one-credit course in Economics and Personal Finance to graduate from high school. The credit is part of the four credits in social studies and the 22 credits required for high school graduation.³³⁴

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Personal finance concepts are embedded in the K-8 social studies standards.³³⁵ While basic economic concepts predominate in most grades, personal finance concepts are covered in grades 4 and 5.³³⁶ For example, in grade 4, students learn to understand the impact of personal financial decisions, such as saving and spending.³³⁷ In grade 5, students learn about the importance of developing a basic budget.³³⁸

Teacher Credentialing

A specific endorsement for financial literacy could not be found, though Economics has its own licensure requirement.³³⁹ The 2019 legislation directed the North Carolina State Board of Education to provide professional development to personal finance teachers, including professional development provided by the North Carolina Council on Economic Education, if funds were available.³⁴⁰

North Dakota

Access

By law, school districts are required to incorporate personal finance concepts into the Problems of Democracy or Economics courses.³⁴¹ Either course satisfies a high school graduation requirement, which makes the personal finance concepts required for all students.³⁴² The state has provided guidance that the personal finance concepts can also be integrated into AP Macroeconomics, AP Microeconomics or a career and technical education course called Financial Literacy (course code 14095).³⁴³ A school district can petition the Superintendent of Public Instruction to allow the personal finance concepts to be integrated into another course.³⁴⁴ The personal finance concepts include checkbook mechanics, savings, credit, earnings, taxation and paycheck withholding, college costs, budgeting, mortgages, retirement savings and investments.³⁴⁵

Graduation Requirements

Students must complete a minimum of 22 credits to graduate from high school, including three units of social studies.³⁴⁶ School districts may choose which courses to offer to meet one of the three units of social studies—one-half unit of U.S. government and one-half unit of Economics or one unit of Problems of Democracy.³⁴⁷ Either the Economics course or the Problems of Democracy course must incorporate specified personal finance concepts.³⁴⁸

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Some financial literacy concepts are embedded in the social studies standards for K-5.³⁴⁹ For example, in grades K-2, students learn to explain how people earn income and save money.³⁵⁰ In grades 3-5, students learn to identify factors that influence saving and spending choices.³⁵¹ The state combines the standards for grades 6-12, which includes benchmarks on financial goals, cost-benefits analysis of credit and debt, and managing debt effectively.³⁵²

Teacher Credentialing

A specific financial literacy endorsement could not be found. The personal finance concepts can be taught by a regular classroom teacher in Economics, Problems of Democracy or other approved courses.³⁵³

Ohio

Access

The 2021 legislature approved a one-half unit of financial literacy as a requirement for all students, beginning with those entering ninth grade in 2022.³⁵⁴ Subsequent guidance from the Ohio Department of Education & Workforce³⁵⁵ indicates that the course can be offered through integration into another course.³⁵⁶

Graduation Requirements

Beginning with students entering ninth grade in 2022, one-half unit of financial literacy is required for high school graduation.³⁵⁷

Core Course Substitution and Postsecondary Recognition

By law, the one-half unit of financial literacy may satisfy a one-half unit of mathematics or an elective requirement.³⁵⁸ Algebra II or any course for which the Ohio Department of Education & Workforce requires an end-of-course examination may not be substituted for the half-unit in financial literacy.³⁵⁹ Because of the integration authority, the financial literacy credit could substitute for additional high school graduation requirements.³⁶⁰

Students must complete a minimum of 20 credits to graduate from high school with four credits in math, including algebra II with certain exceptions.³⁶¹ Ohio State University requires a minimum of four units of math but recognizes that Advanced Computer Science can be used to fulfill one unit of the math requirements.³⁶² Financial literacy is not referenced.

K-8 Financial Literacy Standards

Ohio has adopted financial literacy learning standards in three grade bands: K-3, 4-6 and 7-8.³⁶³ In grades K-3, students learn about spending and saving choices, earned income, personal budgeting and borrowing money.³⁶⁴ In grades 4-6, students learn about taxes, financial management and risk, and decision-making with respect to budgeting.³⁶⁵ Students in grades 7-8 learn about saving and investments, employment benefits and withholding, insurance, financial planning, investing strategies and balancing credit and debt.³⁶⁶

Oklahoma

Access

The 2024 legislature revised ways in which students can learn personal financial literacy by requiring a one-half unit of financial literacy or a set of financial literacy competencies (Passport to Financial Literacy) in grades 10, 11 or 12.³⁷¹ The requirement can be taught as a stand-alone or integrated course or courses.³⁷²

Previous law allowed students to meet the financial literacy requirement through the state's Passport to Financial Literacy, which consists of 14 personal finance concepts and is designed for students in grades 7-12.³⁷³ Under the Passport, school districts have the discretion to determine when each of the 14 concepts is presented to students in grades 7-12.³⁷⁴ The Passport could be integrated into one or more existing courses or offered in a stand-alone, personal financial literacy course.³⁷⁵

Graduation Requirements

Personal financial literacy is a high school graduation requirement either through a stand-alone, half-unit personal financial course or integrated within one or more courses that must be taken in grades 10, 11 or 12.³⁷⁶ To graduate from high school, students must complete 23 units or sets of competencies.³⁷⁷ In 2024, the legislature revised the high school graduation requirements but did not address financial literacy in that bill.³⁷⁸

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

There are few, if any, personal finance concepts addressed in the social studies standards for K-8.³⁷⁹

Oregon

Access

In 2023, the legislature approved a requirement for a half-credit in personal finance education as a requirement for all students beginning with diplomas awarded in 2027.³⁸³ Despite pushback, the Oregon State Board of Education approved temporary rules requiring financial literacy as a stand-alone course.³⁸⁴

Graduation Requirements

Students are required to complete 24 credits to graduate from high school, including a half-credit in Personal Financial Education beginning with high school diplomas awarded in 2027.³⁸⁵ There is a one-year waiver available to school districts with Oregon Department of Education approval based on a lack of educators to teach the course.³⁸⁶

Core Course Substitution and Postsecondary Recognition

The State Board of Education may adopt rules that allow personal finance education to satisfy multiple credit requirements for a high school diploma, including mathematics.³⁸⁷

K-8 Financial Literacy Standards

The state has adopted new social science standards in 2021 for use in the 2026-27 school year.³⁸⁸ The 2018 standards will be used through the 2025 school year.³⁸⁹ Both the 2018 and 2021 standards for social science embed financial literacy concepts in K-8.³⁹⁰ For example, students in kindergarten learn to identify U.S. currency and explain how people earn money.³⁹¹ In first grade, students learn about different uses of money, such as spending or saving.³⁹² Students in second grade learn how saving can help reach financial goals.³⁹³ Students in third grade learn about personal finance decisions.³⁹⁴ Fourth graders learn to analyze opportunity costs, understand a budget and about the consequences of sharing personal information.³⁹⁵ Fifth graders learn to analyze career choices through a return on investment.³⁹⁶ Sixth graders summarize the advantages and disadvantages of checks, credit and debit cards, online or mobile payments, borrowing money and risk and insurance.³⁹⁷ In seventh grade, students learn about credit, financial systems and investing.³⁹⁸ Finally, eighth graders learn about compound interest, financial fees and services and marketing and advertising.³⁹⁹

Teacher Credentialing

The Oregon State Board of Education has adopted temporary rules allowing teachers assigned to atypical assignments, school counselors, administrative license holders, and teachers with restricted career and technical education licenses to teach the financial literacy course.⁴⁰⁰

Pennsylvania

Access

The 2023 legislature required school districts to offer at least a half-credit course in personal financial literacy that students must complete during grades 9-12 beginning with the 2026-27 school year and thereafter.⁴⁰¹

Graduation Requirements

The half-credit, personal finance course is a high school graduation requirement out of 24 credits, beginning with the 2026-27 school year and thereafter.⁴⁰²

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Pennsylvania has recently adopted personal finance standards for grade bands of K-2, grades 3-5 and grades 6-8 in the areas of personal finance fundamentals, income, spending, saving/investing, risk/insurance and credit.⁴⁰³ For example, students in grades K-2 learn to identify short-term financial goals, describe ways people use financial institutions, identify ways to earn income, learn about the purposes of money and to describe the process of borrowing.⁴⁰⁴ In grades 3-5, students learn to identify opportunity cost, identify products and services provided by financial institutions, explain ways to improve income, construct a simple budget, explain payment methods, identify taxes, identify value appreciation and depreciation, explain credit and repayment of credit and provide examples of risk and risk mitigation.⁴⁰⁵ Finally, in grades 6-8, students learn to compare short- and long-term goals, explain opportunity cost, describe financial record keeping, compare compensation methods, compare ways people pay for education and training, interpret a pay statement, apply mathematical skills to assess prices, explain personal budget components, describe the advantages and disadvantages of payment methods, calculate sales tax, explain the changes in value over time, identify and explain investing, assess risk tolerance, describe strategies to protect personal financial information and analyze credit costs and responsibilities.⁴⁰⁶

Teacher Credentialing

The 2023 legislation requires the Pennsylvania Department of Education to specify certifications to teach the required financial literacy course.⁴⁰⁷ However, teachers with certifications in Family and Consumer Science, Business, Computer and Information Technology, Mathematics and Social Studies are allowed to teach the course by law.⁴⁰⁸ The department appears to have additionally authorized certification holders with certifications in Agriculture, Citizenship Education and Marketing/Distributive Education to teach the course.⁴⁰⁹

Rhode Island

Access

The 2021 legislature required school districts to offer a high school course that includes instruction in consumer education aligned to the state standards by the start of the 2022-23 school year.⁴¹⁰ According to guidance from the Rhode Island Department of Education, the course may be a stand-alone course or integrated into existing courses.⁴¹¹

Graduation Requirements

Beginning with the graduating class of 2024, students must demonstrate proficiency in consumer education to graduate from high school.⁴¹² School districts may allow students to demonstrate this proficiency through successful completion of one of the following actions, all of which must be aligned with the state standards and approved by the Council on Elementary and Secondary Education: a consumer education course of study, project, consumer education assessment or another demonstration of proficiency.⁴¹³

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Rhode Island has adopted the National Standards for Personal Financial Education by the Council for Economic Education and Jump\$tart.⁴¹⁴ The standards are organized around six topics with student learning expectations by the end of the 4th, 8th and 12th grades. The six topics are earning income, spending, saving, investing, managing credit and managing risk.

Teacher Credentialing

A specific endorsement for financial literacy could not be found.⁴¹⁵ While there is a Family and Consumer Sciences certification, the Rhode Island Department of Education's (RIDE) guidance on financial literacy does not indicate that the certification is required for the consumer education course.⁴¹⁶ Instead, RIDE has partnered with Next Gen Personal Finance to support financial literacy professional development and has identified micro-credentialing programs that would assist educators in delivering financial literacy lessons.⁴¹⁷ Neither the partnership nor the micro-credentials are required.

South Carolina

Access

The 2022 legislature directed the South Carolina Department of Education/State Board of Education to adopt rules to require a half-credit in personal finance for high school graduation requirements.⁴²⁰ The half-credit personal finance course (5141) appears to be a stand-alone course requirement.⁴²¹ Standards for the new course have been adopted.⁴²²

Graduation Requirements

Beginning in 2023-24, students entering ninth grade must complete a half-credit in personal finance out of 24 credits required to graduate from high school.⁴²³ In addition to the half-credit, stand-alone, personal finance course, the South Carolina Department of Education has identified several one-credit courses that would meet the personal finance requirement, including Advanced Personal Finance (5131), Banking Services (5271), Business Finance (5273), Entrepreneurship (5400), Financial Fitness (5812) and Securities and Investments (5277).⁴²⁴

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

There are few personal finance concepts embedded in the social studies standards for K-8.⁴²⁵ For example, in grade 2, students learn to examine currency and create a budget.⁴²⁶ However, additional personal finance concepts were not found in grades 3-8.

Teacher Credentialing

Teachers with certifications in Business/Marketing or Family and Consumer Science can teach the financial literacy course without additional training.⁴²⁷ Teachers with certifications in Economics and Math would need additional training.⁴²⁸ There are some additional certifications that would qualify but are no longer issued to new teachers.⁴²⁹

South Dakota

Access

South Dakota has a stand-alone course in personal finance that students can choose to take to fulfill high school graduation requirements.⁴³⁰ According to Next Gen Personal Finance, 57% of high school students in the state are required to take the personal finance course to graduate due to school districts mandating the personal finance course.⁴³¹ However, not all high schools offer the course in the state.⁴³²

Graduation Requirements

Students are not required to complete a personal finance course for high school graduation. Students have the option of completing a half-credit course in Economics or Personal Finance out of 22 credits for high school graduation purposes.⁴³³ The Economics course standards do not appear to cover personal finance concepts.⁴³⁴

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Although some basic economic concepts are covered in the social studies standards, substantive personal finance concepts could not be found in the social studies standards for K-8.⁴³⁵

Teacher Credentialing

A Personal Finance course (19262) is taught in career and technical education (CTE), which meets the high school graduation requirement.⁴³⁶ It requires teachers to have certifications or endorsements in Business Management & Administration Cluster Endorsement, Finance Cluster Endorsement, Marketing Cluster Endorsement, Family and Consumer Services Endorsement, grades 7-12 Mathematics Licensure or grades 7-12 Social Science Education-Economics certification.⁴³⁷

Tennessee

Access

The state requires students to complete a stand-alone, half-credit, Personal Finance course (C12H24) beginning with the class of 2013.⁴³⁸

Graduation Requirements

Students are required to earn a half-credit in Personal Finance out of 22 credits to earn a high school diploma.⁴³⁹ Three years of JROTC may be used to satisfy the Personal Finance requirement if the instructor attends personal finance training.⁴⁴⁰

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Some personal finance concepts are embedded in the economics strand of the social studies standards for K-8.⁴⁴¹ For example, kindergarteners learn the benefits of saving money and about the use of money to make purchases.⁴⁴² In first grade, students learn about the factors that could influence a person to spend or save money.⁴⁴³ In second grade, students learn to describe the purpose of a budget.⁴⁴⁴ There do not appear to be substantive personal finance concepts in the social studies standards for grades 3-8.

Teacher Credentialing

There are more than 40 individual teacher endorsements that allow teachers to teach the Personal Finance course, plus any CTE Professional License with state approved training.⁴⁴⁵ Additionally, teachers without the required endorsements may teach the course with state-approved training.⁴⁴⁶

Access

The 2021 legislature added a Personal Financial Literacy and Economics course as a means for students to meet the half-credit in Economics requirement needed to graduate from high school.⁴⁴⁷ All high schools must offer both the Economics course and the Personal Financial Literacy and Economics course to students unless a school district, with a total high school enrollment of fewer than 500 students, receives a waiver from the Texas Education Agency, in which case the school district may offer only one of the courses.⁴⁴⁸ The Economics course does contain personal financial literacy concepts, such as business ownership, the role of financial markets in saving, borrowing and capital formation, the role of the individual in financial markets, cost-benefit analysis of personal finance decisions, personal budgeting and paying for postsecondary education and training.⁴⁴⁹

Graduation Requirements

Students must earn a half-credit in Economics or Personal Financial Literacy & Economics out of 22 total credits to graduate from high school.⁴⁵⁰

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Personal finance concepts are embedded in the social studies and mathematics standards in K-8.⁴⁵¹ For example, in the social studies standards, in second grade students learn to explain work income and choices individuals make about earning, spending or saving money.⁴⁵² In third grade, students learn to create a budget.⁴⁵³

In the math standards, students apply math to personal financial literacy concepts.⁴⁵⁴ For example, kindergarteners learn to manage financial resources.⁴⁵⁵ In first grade, students are expected to define money earned as income and distinguish between spending and saving.⁴⁵⁶ In second grade, students calculate money savings over time, distinguish between a deposit and a withdrawal, identify examples of responsible borrowing, and identify examples of lending.⁴⁵⁷ In third grade, students are expected to explain

Utah

Access

Students are required to take a stand-alone General Financial Literacy course, which the Utah State Board of Education recommends students take in grades 11-12.

Graduation Requirements

Students must earn a half-credit in General Financial Literacy out of 24 credits to graduate from high school.⁴⁶⁵

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Personal finance concepts are embedded in the social studies standards for K-2.⁴⁶⁶ For example, in kindergarten students learn to identify ways that people use money, such as spending or saving. In first grade, students learn to explain the cost and benefits of saving and spending and ways to make a living. Second graders learn about the benefits of personal savings and opportunity cost.

The State Board of Education is directed to fully integrate financial literacy into instruction in kindergarten through grade 12 in other areas of the core standards, such as mathematics and social studies.⁴⁶⁷ It is not clear how this is being accomplished.

Teacher Credentialing

Teachers must hold a General Financial Literacy endorsement to teach the General Financial Literacy course.⁴⁶⁸ The endorsement attaches to a secondary or career and technical education license.⁴⁶⁹

Other (Authentication)

Students are required to take a General Financial Literacy assessment in the course, although passage is not required for course credit.⁴⁷⁰

The Utah State Auditor conducted a program review of the state's general financial literacy graduation requirement in 2018.⁴⁷¹ For the report, the Auditor surveyed instructional staff, administrators, General Financial Literacy (GFL) course instructors and high school graduates (from Utah and surrounding states that did not have a personal finance mandate), as well as analyzed the state's

471 - Utah's General Financial Literacy Graduation Requirement: A Program Review, Office of the State Auditor, October 5, 2018, available at: <https://schools.utah.gov/cte/cte/gfl/AuditorsReport.pdf>

GFL assessment results.⁴⁷² The Auditor's report made the following findings:

- Utah students who take GFL courses appear to have greater financial knowledge and behaviors;
- GFL assessment demonstrated that students were becoming increasingly proficient;
- There are opportunities to improve sub-group performance;
- Student gains are not consistently measured (due to lack of pre-test administered statewide);
- Educators generally believe that GFL is important;
- GFL proficiency is not used on student accountability and not publicly reported;
- There are staffing and oversight concerns with the GFL course; and
- GFL assessment could be improved.⁴⁷³

⁴⁷²⁻⁴⁷³ - Id.

Vermont

Access

Financial literacy is not a required statewide course to be offered to students. However, the state has adopted the Jump\$tart National Standards in K-12 Personal Finance Education, which school districts must locally determine how to instruct and assess the financial literacy concepts.⁴⁷⁴

A bill was introduced in 2023 to require a semester-long personal finance course in 11th or 12th grade; however, the bill did not advance.⁴⁷⁵

Graduation Requirements

A financial literacy course is not required for high school graduation. However, the state's adoption of financial literacy standards would mean that school districts would need to provide appropriate learning opportunities to students to support their attainment of the standards.⁴⁷⁶ Additionally, the state's profile of a graduate includes students having the knowledge necessary to make financially responsible decisions.⁴⁷⁷

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

The state has adopted the Jump\$tart National Standards in K-12 Personal Finance Education.⁴⁷⁸ School districts locally determine the manner in which to provide financial literacy instruction to students.

Teacher Credentialing

A specific endorsement for financial literacy could not be found.⁴⁷⁹

Virginia

Access

The state requires students to complete a one-credit course in Economics and Personal Finance.⁴⁸⁰

Graduation Requirements

One credit in Economics and Personal Finance is required out of 22 total credits for the standard or advanced studies high school diploma.⁴⁸¹ The Virginia Department of Education has identified courses that meet this requirement: Finance (6120), Economics and Personal Finance (19262), Economics and Finance (22210-I), Finance (22210-II) and Economics (04249) or other courses that are aligned with the Economics and Personal Finance Standards of Learning.⁴⁸²

Core Course Substitution and Postsecondary Recognition

None for the standard or advanced studies diploma.

K-8 Financial Literacy Standards

Financial literacy concepts are embedded in the state's history and social science standards of learning in K-8.⁴⁸³ For example, in kindergarten students learn to describe the ways people work to earn and save money.⁴⁸⁴ In first grade, students learn to describe why people make choices, prioritizing needs over wants.⁴⁸⁵ In third grade, students learn about opportunity cost.⁴⁸⁶ Seventh graders learn deeper economic concepts including some personal financial concepts, such as financial responsibility in terms of credit, savings and investments.⁴⁸⁷

Virginia has also adopted Economics Education and Financial Literacy objectives that are correlated to math, history and social science standards, and career and technical education competencies at the middle and high school levels.⁴⁸⁸

Washington

Access

School districts are required to provide students in grades 9-12 with access to the financial education standards.⁴⁹² Such access can be through class time, before or after school, during lunch periods, at library or study time, at home, via online learning opportunities or through career and technical education course equivalencies.⁴⁹³

In 2024, the legislature advanced a bill that would have required school districts to provide students with access to at least a half-credit of financial literacy instruction.⁴⁹⁴ The Washington House of Representatives would have required that students complete a half-credit of personal finance instruction either through a stand-alone course or embedded into other courses for high school graduation beginning with graduating class of 2031.⁴⁹⁵ The Senate did not approve the graduation requirement.⁴⁹⁶ Ultimately, the bill did not pass.

In 2022, the legislature established a grant program for the years 2023-24, 2024-25 and 2025-26 that would provide grants to school districts to integrate financial literacy education into professional development.⁴⁹⁷ Additionally, school districts were directed to adopt one or more goals for expanding financial education to students, including increasing the number of financial education courses, increasing the number of grades or schools offering instruction in financial education or expanding the amount of professional development training in financial education.⁴⁹⁸

Graduation Requirements

A financial literacy course is not required for high school graduation. Students are required to complete the High School and Beyond Plan, which includes the process for obtaining financial aid that helps pay for postsecondary programs. Additionally, the state has adopted financial education learning standards based upon the Council for Economic Education National Standards for Financial Literacy and the Jump\$tart National Standards.

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

The state has adopted financial literacy standards based upon the Council for Economic Education National Standards and Jump\$tart National Standards for K-12 with six competencies relating to spending and saving, credit and debt, employment and income, investing, risk management and insurance and financial decision-making.⁴⁹⁹

Teacher Credentialing

A specific endorsement for financial literacy could not be found.⁵⁰⁰

West Virginia

Access

The 2023 legislature required students to complete a stand-alone, half-credit course in personal finance beginning with students entering ninth grade in 2024-25.⁵⁰¹ The West Virginia State Board of Education adopted a one-credit course for personal finance.⁵⁰²

Graduation Requirements

Beginning with students entering ninth grade in the 2024-25 school year, each high school student must complete a half-credit course in personal finance during their 11th or 12th grade year as a requirement for high school graduation.⁵⁰³ Students must complete 23 credits to graduate from high school.⁵⁰⁴

In the 2024 legislative session, a bill to add computer science as a high school graduation requirement passed the House of Representatives but was amended in the Senate to make computer science or personal finance a high school graduation, but not both.⁵⁰⁵ The House refused to concur, and the bill did not pass in 2024.

Core Course Substitution and Postsecondary Recognition

None.

K-8 Financial Literacy Standards

Financial Literacy concepts are embedded in grades K-5 and grades 6-12 in the WV College & Career Readiness Standards for Social Studies.⁵⁰⁶ For example, in first grade, students learn to explain how individuals earn, spend and save money.⁵⁰⁷ Students in second grade learn to explain the role of banks in saving for future purchases, as well as to evaluate consequences of one choice or another.⁵⁰⁸ Third graders study bank services, create a mock budget and explore college savings plans.⁵⁰⁹ In eighth grade, students learn to examine financial aid planning opportunities and programs, including constructing a personal budget that includes college savings.⁵¹⁰

Teacher Credentialing

The West Virginia State Board of Education is directed to identify eligible teacher certifications.⁵¹¹

Wisconsin

Access

The 2023 legislature approved a requirement for a stand-alone, personal financial literacy course that students must take beginning with students graduating from high school in 2028.⁵¹²

Graduation Requirements

Beginning with the graduating class of 2028, to graduate from high school students are required to earn at least a half-credit of personal financial literacy that includes financial mindset, education and employment, money management, saving and investing, credit and debt and risk management and insurance.⁵¹³ Students are required to earn 15.5 credits to graduate from high school.⁵¹⁴

Core Course Substitution and Postsecondary Recognition

None.⁵¹⁵

K-8 Financial Literacy Standards

School districts are required to adopt academic standards for financial literacy and incorporate financial literacy instruction into the curriculum for K-12.⁵¹⁶ The state adopted standards for personal financial literacy that are divided into six strands—financial mindset, education and employment, money management, saving and investing, credit and debt and risk management and insurance.⁵¹⁷ These strands match the new law's requirement for the personal financial literacy course.⁵¹⁸ However, adoption of the Wisconsin Standards for Personal Financial Literacy is voluntary for school districts.⁵¹⁹

Teacher Credentialing

A specific endorsement for financial literacy could not be found. The Wisconsin Department of Public Instruction has released guidance indicating that teachers with licenses in business, economics, social studies or family and consumer sciences can teach the financial literacy course.⁵²⁰

Wyoming

School districts are required to provide educational programs to meet content and performance standards as set by the Wyoming State Board of Education, which includes skills in personal financial management.⁵²¹ However, the state does not require a financial literacy course to be offered to students.

Although the state requires instruction in economic systems and institutions for high school graduation, a financial literacy course is not required.⁵²²

None.

- ✓
- ✓
-

Financial literacy concepts are embedded in the social studies standards. The social studies standards include a standard on Production, Distribution and Consumption, in which students are to describe the influence of economic factors on societies and make decisions based on economic principles.⁵²³ For example, by the end of grade 2, students learn to identify how price may affect buying, selling and saving decisions.⁵²⁴ By the end of grade 5, students learn to explain the effect money has on banking, savings and budgeting in personal life.⁵²⁵ Finally, by the end of grade 8, students learn to explain how money is used by individuals, groups and financial institutions.⁵²⁶

Some financial literacy concepts are also addressed in some of the performance standards for the math standards for K-8.⁵²⁷

A specific endorsement for a financial literacy course could not be found.⁵²⁸
